IMPORTANT NOTES:
Please Read Carefully & retain these instructions for Future Reference.

1. For ease & safety we advise that two persons assemble this product.
2. Protect shower tray surfaces at all times.
3. Exposed glass corners / edges MUST NOT contact hard surfaces at any time.
4. Check for cables, pipes etc before drilling walls.
5. Ensure all surfaces are dry, clean & free of loose debris / dust.
6. Unpack goods with care (small parts can become lodged in packaging & inadvertently discarded).
   Check parts supplied against parts & fittings listed herein. Damaged parts / omissions may be resolved by calling Lakes Bathrooms Helpline.
7. Whilst precautions are taken in manufacture, care must be taken when handling as rail ends may have sharp edges.
8. Before commencing, check:
   a) shower tray (or base) is level & completely sealed to finished / tiled walls.
   b) finished walls are sound & free of cracks, loose tiles / grout.
8. AFTER INSTALLATION, DO NOT 'WET' ENCLOSURE FOR 48 HOURS TO ENSURE FULL CURE OF SILICONE SEALANT.

USE:

General Care & Maintenance.

Provided this product is installed & operated in accordance with these instructions, problems should not arise. However should maintenance be required it should be carried out by a competent person with reference to these instructions. Before any work is carried out the root cause of the problem must be identified. Lakes Bathrooms service engineers are available if necessary to consult / carry out remedial work. Call Lakes Bathrooms HELPLINE.

Cleaning.

(Every one to two weeks depending on local water {hardness} conditions).
All glass panels in this product have a hydrophobic coating aiding ‘runoff’ of water droplets, reducing the need for frequent cleaning. For best appearance / product life however, regular cleaning is recommended.
Use ONLY mild soap / detergent solutions to clean. Rinse with water, squeegee glass panels & wipe frames dry with a soft cloth. Under no circumstances should abrasive, caustic or scouring products be used. Non compliance with these cleaning instructions may cause decorative finishes to deteriorate & could adversely affect safe operation of the enclosure.

Daily Care.

To prevent the build up of limescale, do not allow water droplets to dry on glass or frames. After showering, rinse with water, remove droplets from glass with a squeegee & wipe frame with a soft cloth.

Customer Service.

Quality Guarantee : Lakes Bathrooms Ltd guarantee Shower Doors & Enclosures against any manufacturing or material defects for the lifetime of the product. We will resolve defects free of charge by repairing / replacing parts as we feel necessary. To be 'free of charge' service work must be carried out by Lakes Bathrooms or approved agents.
Seals are considered 'wear & tear' parts, as such they are guaranteed for 12 months from purchase.
Not Covered by this Guarantee : Damage or defects that result from improper installation, improper use, or lack of maintenance (including limescale buildup). Damage or defects that result from repairs / modifications undertaken by unauthorized persons. This guarantee is in addition to statutory & other legal rights.

What to do if something goes wrong : Should the product not function correctly on initial use, firstly, contact the installer to check that unit installation & commissioning are in accordance with these instructions. Should this not resolve difficulties or should performance decline, consult 'Troubleshooting' section to see if simple home maintenance is needed. Alternatively our HELPLINE staff can assist, or if necessary arrange for a service engineer to visit.
Spares : We maintain extensive spare part stocks. Spares can be ordered / purchased from your retailer in the first instance. Parts will normally be dispatched within two working days from order placement.
SUPPLIED PARTS:

Pivot Door Assembly: Comprising

- Vertical Rail (Hinge Side 1x)
- Vertical Rail (Magnet Side 1x)
- Hinge Boss (Frame 2x)
- 3.5 x 12 long self tapping csk head screw (6x)
- 3.5 x 40 long self tapping screw (8x)
- Hinge Assy (Door 2x)
- Glazing Screw (4x)
- Glazing Washer (4x)
- Vertical Rail (2x Handed Pair)
- Horizontal Rail
- Hinge Cover (2x)
- Frame Vertical Seal (1x)
- Frame Magnet Seal (1x)
- Door Magnetic Seal (1x)
- Wall Rail (1850mm 2x) fig A/B
- Door Gutter / Drip Seal (1x) fig C
- End Cap for Bottom Seal (2x Handed Pair)
- 4 x 45 long self tapping screw (6x) fig A / B
- 7,5 x 39mm Wall Plug (6x) fig A / B
- 3.5 x 10 long self tapping pan head screw (6x) fig C
- Cup Washer (12x) fig A / C
- Decorative Screw Cover Cap (12x) fig C

Handle Kit (1x) comprising:
- Handle
- Top Knob
- Bottom Knob
- Screw (2 per kit)
- Sleeve (2 per kit)
- Washer (4 per kit) fig C

Top Cap ~ Hinge Side Vert Rail (2x Handed Pair) fig D

Top Cap ~ Magnet Side Vert Rail (2x Handed Pair) fig D
Lakes Fully Framed Pivot Door is fully reversible, so is suitable for fitting with door to left or right hand side of enclosure. Ensure tray is correctly levelled & that tray / wall (tile) joints are sealed & cured over entire length of tray sides (See Fig A) prior to fitting enclosure. **DO NOT SEAL TRAY EDGES UPTO A FITTED ENCLOSURE!**

**Tools Required**
- Dia 8mm Tile / Masonry Drill Bit
- Dia 3mm HSS Drill Bit
- Pencil
- Screwdriver (Pozi Drive)
- Good quality Silicone Sealant & applicator
- Tape Measure
- Spirit Level (with vertical “bubble”)
- HSS Drill Bit

Measure & mark wall rail positions. Mark fixing hole positions, drill & plug walls. Having decided required handing, FIT DOOR SIDE WALL RAIL ONLY AT THIS STAGE.
Push remaining wall rail fully onto hinge side.
Keeping unit upright, lift over tray &
1. Push door (magnet) side into fixed wall profile.
2. Push panel end back into alcove. Align & fix panel side wall profile to wall with 4 x 45 long pan head screws & cup washers (3 each).
Note Seals may be ‘wetted’ to ease assembly.
1. With drip strip to inside, fit seal to bottom of door glass by sliding along & upward: correct seal position is reached with glass overhanging seal by approx 2mm.
2. With magnetic face to inside, push on magnetic seal as shown.
3. Select appropriate hand end cap, apply silicone sealant to cap & push into end of bottom seal ~ wipe of excess sealant with a damp cloth.
1. Centre enclosure in wall profiles & ensure that frame is plumb, door pivots freely & magnet seals hold & are in contact over full door height.
2. With door in open position, from inside enclosure, using wall rail holes as a guide, drill (dia 3mm) fit cup washer & screw main panel to wall rail using 3.5 x 10 long pan head screws (3x per wall rail). Push on decorative cover caps to ALL screws/washers (including wall rail screws).
Use of good quality silicone sealant & cleaning / degreasing of all joint areas is recommended. Apply continuous silicone sealant bead as indicated EXTERNALLY ONLY.
BASIC TROUBLESHOOTING:

Door magnetic seals not meeting precisely / not holding:
Check plumb/level of frame & door alignment, adjust frame if necessary (see fig D).
Check magnet polarity, frame magnet may be removed, reversed & refitted to improve door ‘closing’.

Leakage:
The sealing method described in these instructions relies on a continuous seal being applied between shower walls & tray before installing the enclosure (see fig A), it ensures a watertight seal around the perimeter of the enclosure to the shower walls & tray.
In the unlikely event of an enclosure leak, water will be visible on the outside of the enclosure itself, or around the perimeter silicone seal ONLY. Water / moisture appearing outside this area (ie at floor level) is normally due to incorrect tray installation.
